

Please replace the paragraph on page 1, lines ¹²~~17~~-18 with the following amended paragraph:

J.L.
8.21.09

Recent developments in music compression, storage capacity and broad-band
5 networks have made it possible that consumers have access to large quantities of
information of various kinds. For example, a database of compressed music files may
be stored on the hard disk of a personal computer and browsed and listened to by the
user. Alternatively, music files may be stored on a remote server, and accessed via a
computer network such as the internet. ~~Examples of such on-line jukeboxes can be~~
10 ~~found at www.musicmatch.com, www.mp3.com and~~
~~www.music.sony.communication/jukebox.~~
